

# Series 100 & 200 Product Updates for 2016 UL Listing

## March 2016

SnapNrack's 100 and 200 Systems recently received an updated UL 2703 listing that will further enhance the huge benefit that users of SnapNrack products have been receiving.

All items in the SnapNrack price list are now approved for use on UL-compliant installations. The new standard for Series 100 and 200 is that they are designed as UL-listed systems.

This conversion sheet serves as a guide for what is changing and to help you when ordering for a UL-compliant system. The following tables list products being phased out on the left with the new replacement products on the right.

### ROOF ATTACHMENTS

Phased Out Item	Phased Out Item Number	New Item	New Item Number	Explanation
Bonding Black L Foot, Black Galv Flashing, And Base Kit	242-02701	Black L Foot, Black Galv Flashing, And Base Kit	242-92051	Under Series 100's new UL listing roof attachments are exempt from bonding requirements as they are not part of the effective ground path. This allows for the removal of pinned channel nuts and other improvements which reduce costs overall.
Bonding Clear L Foot, Black Galv Flashing, And Base Kit	242-02700	Silver L Foot, Black Galv Flashing, And Base Kit	242-92050	
Bonding Black L Foot, Black Alum Flashing, And Base Kit	242-02703	Black L Foot, Black Alum Flashing, And Base Kit	242-92048	
Bonding Clear L Foot, Mill Alum Flashing, And Base Kit	242-02702	Silver L Foot, Silver Alum Flashing, And Base Kit	242-92047
